

Current IEC working documents within technical committee no. 62

as of August 9th, 2010. New documents have been marked in blue color.

62A: Common aspects of electrical equipment used in medical practice

62B: Diagnostic imaging equipment

62C: Equipment for radiotherapy, nuclear medicine and radiation dosimetry

IEC 61217 Ed.2: Radiotherapy equipment – Coordinates, movements and scales (10.9.2010).

IEC 60601-2-xx: Particular requirements for basic safety and essential performance of X-ray based image guided radiotherapy with electron accelerators (29.10.2010).

62D: Electromedical equipment

IEC 80601-2-60 Ed.1: Particular requirements for basic safety and essential performance of dental equipment (1.10.2010).

Color codes according to the document stage:

0. **NP** = New Work Item Proposal (usually no comments possible, but IEC is looking for experts helping to develop the new standard)
1. **CD** = Committee Draft
2. **CDV** = Committee Draft for Vote (last chance for major changes)
3. **FDIS** = Final Draft International Standard (only editorial comments allowed)

Please note that comments should be prepared 4 weeks before the dates given above.
